

Cyber Security Awareness Training

Empowering the last line of defense - your Staff

The Program:

- Initial Baseline Testing
- Train & Educate Your Staff
- Keep Everyone Sharp with Simulated Attacks
- Report The Results
- Focus On Key Individuals
- Monthly Hints and Tips Emails
- Saves Thousands!
- Required for HIPAA, PCI, SOX, & GLBA Compliance
- Lower your Cyber Security Insurance premiums

Help them, help you!
Your team doesn't wake up thinking, how can I cost the company thousands of dollars, or put my colleagues at risk. Yet without this training, they run the risk of doing just that every day.

Cyber Security Ignorance

No one wants to be the person that wires thousands of dollars to a criminals account, forwards everyone's SSN & address to identity thieves, or clicks on a link that encrypts all the data on the company servers until a hefty ransom is paid. Yet we have all heard these stories, and not just in the news but through word-of-mouth. What steps are you taking to prevent it from happening in your workplace?

We can Help!

BMT's security awareness training program will give your staff the critical information they need to avoid falling victim to cyber scams and thieves, protecting your information while in the office, out on the road, or at home.

Comprehensive Training

Baseline testing establishes how prone your organization is to attacks. On-demand training consists of interactive presentations with the right mix of: videos, mini quizzes and scenario-based exercises. Simulated attacks reinforce the training. Reporting shows the program is working.

A Complete Awareness Program

It's not just training and assessing. We can integrate with HR's onboarding process to make sure each new hire is assigned the training, and they "Read and Attest", to your security policy for compliance purposes. We'll send a monthly Hints and Tips email and share cyber security awareness posters to print hang in the break room.

Engage your team

A formal program, with reported results, keeps your staff mindful of their role in cyber security and
